

JUNYI LU

University of Electronic Science and Technology of China

PROFILE

I am an AI engineer graduated from the University of Electronic Science and Technology of China and currently work at China Mobile. My research focuses on large language models, AI agents, deep learning, and artificial intelligence. During my studies, I primarily worked on quantum machine learning, quantum hidden Markov models, and time-series finance. I am currently seeking a research assistant position related to large language models or AI agents.

PERSONAL INFORMATION

Phone number: (+86)18244286576

Email: l jy623669155@163.com

EDUCATION

University of Electronic Science and Technology of China, China **Sep 2020-Jun 2023**
MSc in Quantum Machine Learning

Southwest Petroleum University, China **Sep 2015-Jun 2019**
BEng Internet of Things Engineering

PUBLICATION

SONG, X.; CHEN, W.; LU, J. 2025. Research on Financial Stock Market Prediction Based on the Hidden Quantum Markov Model. Mathematics, 13, 2505. (JCR Q1)

LU, J.; HU, Y.; LI, X. et al. 2022. A New Stock Forecasting Model by Hidden Quantum Markov Models. In: ICAIS 2022, pp. 438-447. DOI: 10.1007/978-3-031-06788-4_37.

CHEN, S.; LU, J.; TENG, B. 2022. Study on the influence of scale on the phase transition properties of nanoisland. Physica A: Statistical Mechanics and its Applications, 593, 127004. (JCR Q2)

PATENTS

Disease Progression Prediction System and Platform Based on Quantum Neural Networks, CN114496227B (Granted, April 2023)

Method for Predicting Ligand-Protein Interactions Based on Quantum Computing, CN114446383B (Granted, April 2023)

Quantum Open System Simulation Method, Storage Medium and Terminal Based on Different Measurement Approaches, CN113609704B (Granted, August 2023)

Simulation Method for Quantum Conditional Master Equation in Quantum Transport Processes Using Recurrent Neural Networks, CN112784472B (Granted, March 2023)

HONORS & AWARDS

First-Class Graduate Academic Scholarship & Outstanding Graduate Student Award,
University of Electronic Science and Technology of China, 2021,2022

Outstanding Teaching Assistant Award, University of Electronic Science and Technology of China, 2021

Alibaba Cloud Certified Professional (ACP) – Large Language Model Specialist, Alibaba Cloud, Nov 2025

PROFESSIONAL EXPERIENCE

Developed an AI-agent system from scratch for the AIoT platform, empowering over 1 billion connected devices with scalable AI capabilities, China Mobile, 2025–present

Webpage: <https://open.iot.10086.cn/console/agent/agentManagement>

Contributed to the research of domain-specific LLMs, specifically fine-tuning an Ecological Environment LLM and executing on-premise deployment for a Water Resources LLM, China Mobile, 2024–2025
